DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 1-9 rejected under 35 U.S.C. 103(a) as being unpatentable over Bargar et al. (5,222,170) in view of Kluitmans et al. (5,065,226) further in view of Wolf et al. (6,414,835).

Regarding Claims 1-9, Bargar et al. in Figs. 2 and 12 disclose a package comprising an optical fiber mounted in a feedthrough tube which is aligned with a laser through an aperture in a wall of the package. The alignment is held by a first alignment means which is secure to the wall and to the feedthrough tube relatively close to the wall and by a second alignment means which is also fixed to the wall. Bargar et al. fail to disclose the required ground bonding structure and the ground electrodes/wirebonds are electrically connected to each other. However, Kluitmans et al. disclose a laser diode module structure in which in Fig. 1 the required ground pad structure is disclosed. Furthermore, Wolf et al. disclose a capacitive filtered feedthrough array for an implantable medical device where in column 20, lines 58-63, the required ground electrodes that are electrically connected to each other.

It would have been obvious to one of having ordinary skill in the art at the time the invention was made to include the required ground pad structure and the electrically connected ground electrodes in Bargar et al. as taught by Kluitmans et al. and Wolf et al. respectively, in order to have a semiconductor package structure with higher reliability.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
